SOUND THERAPY

AQUATHERAPY

The tactile sensation offered by instant contact with water produces a world of atmospheres, sounds, and emotions to discover. Each jet offers a unique experience, recalling powerful sensations that help you tap into all your emotions.

CHROMOTHERAPY

The human body reacts in different ways to visual stimulations. Each color represents a particular mood, and offers energetic & emotional value that can improve our psychological wellness, and provide a more complete spiritual renewal.

AROMATHERAPY

More than any other sense, smell facilitates memory recall, whether it be of a place, person or moment. The integration of fragrances into a sensorial experience enhances its energetic power, and allows for a lasting feeling of relaxation & serenity.

SOUND THERAPY

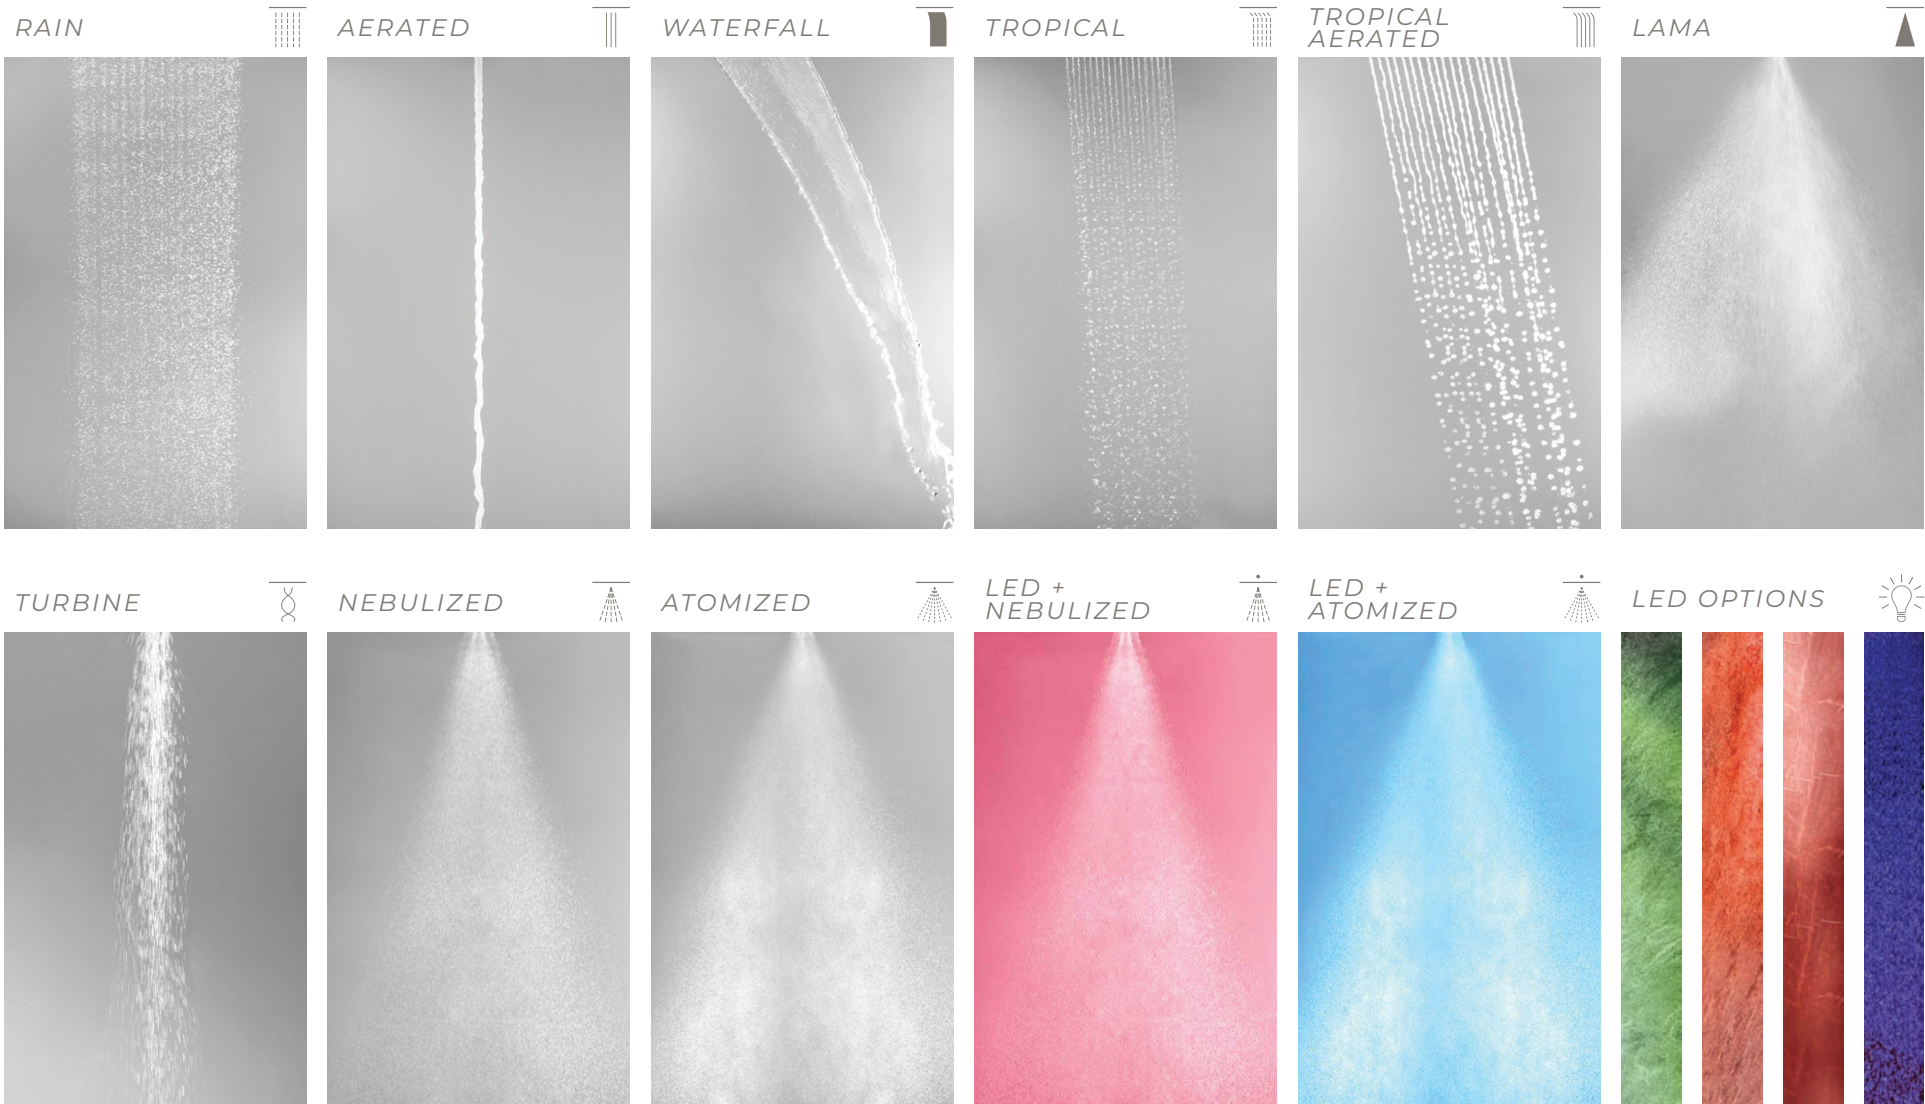

We constantly ingest all kinds of busy noise from our surroundings, but we underestimate the energetic power of sound. From the light whispers of a steam cloud to the mighty sound of a waterfall, the distinct sound of each jet embraces our body and removes daily stress.
